**DETAILED ACTION**

***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims 1-9 are directed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- are rejected under 35 U.S.C. 102(b) as being anticipated by US 5339172 to Robinson.

As to claim 1, Robinson discloses a method for segmenting an image comprising:

determining a selected segmentation mode to be used when segmenting the image (Fig. 4 col. 7, line 7-col. 9);

determining if selected segmentation mode is an automatic mode (col. 7, line 7-col. 8 line 15);

inputting a new value for each at least automatic segmentation parameter to be changed, if the user wishes to change at least one parameter (col. 8 lines 5-16); and

Art Unit: 2623

segmenting the image using the automatic parameter values, including the new segmentation parameter values (Fig. 4-5, col. 8-col. 10, line 15).

As to claims 2 and 5, Robinson further discloses alternating at least one other automatic segmentation parameter value each time the new parameter is selected (col. 8 line 5-col. 9 line 66).

As to claims 3-4, Robinson further discloses storing the at least one new segmentation parameter value (col. 9 lines 9-66).

### ***Allowable Subject Matter***

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-9 depend from claim 6, therefore, are objected.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6246783 to Avinash, US 6167156 to Antoniadis et al, and US 5852490 to Johnson disclose method for segmenting the image.
